

Federal Rental Tax and US GAAP Sourcebook

Federal income-tax rules, information reporting, recordkeeping, FinCEN status, and a licensed-access map to nongovernmental US GAAP

Prepared for	GH Real Estate, LLC
Property	Fourplex - 9401 Nieman Road, Overland Park, Kansas 66214
Current through	July 12, 2026
Intended use	Upload after Volume 00. Use for federal tax and financial-reporting questions involving the GH fourplex.
Authority model	Binding law, authoritative administrative sources, official guidance, GAAP topic locators, and project controls are labeled separately.

Important limitation

This is a curated, dated authority map and operating sourcebook, not a substitute for the live law, a signed lease, a tax return position, legal advice, or a CPA engagement. No static PDF can make an AI answer legally binding. The cited live authority controls.

Prepared as a searchable source for a ChatGPT Project. Official URLs are printed in full in each source register.

1. Federal scope and controlling assumptions

This volume assumes GH Real Estate, LLC is a Kansas domestic single-member LLC that has not elected corporate treatment; the owner reports ordinary long-term residential rental activity on the cash method; no employees or substantial tenant-convenience services exist. Each assumption must be verified from filed documents and actual operations.

GAAP and tax are different systems

GAAP is an accrual financial-reporting framework. The Internal Revenue Code and Treasury Regulations control federal taxable income. Cash basis and income-tax basis are other comprehensive bases of accounting, not GAAP. Maintain book-tax adjustments instead of forcing one system to mimic the other.

2. Federal authority hierarchy

Rank	Authority	Use
1	Internal Revenue Code and enacted public laws	Controlling statutes for the applicable tax year
2	Treasury Regulations	Controlling regulations, subject to statute and binding judicial decisions
3	Binding judicial precedent	Supreme Court, Tenth Circuit, and applicable Tax Court/court precedent; obtain professional research for disputes
4	Published Internal Revenue Bulletin guidance	Revenue rulings/procedures, notices, announcements, and Treasury Decisions
5	Forms, instructions, publications, topics, FAQs	Operational guidance; not statutes and not a substitute for controlling authority
Separate	FASB Codification	Authoritative nongovernmental US GAAP if GAAP reporting is required or elected; not tax law

3. Entity, return, and accounting method

- Verify the latest Form 1040, Schedule E, EIN notice, Articles/operating agreement, and any Forms 8832 or 2553. A single-member domestic LLC is generally disregarded for federal income tax unless it elects corporation treatment.
- For income-tax information reporting, the owner generally supplies the owner's legal name and TIN on Form W-9 line 1 and the disregarded LLC name on line 2. Employment and certain excise taxes treat the LLC separately.
- Use the tax accounting method shown on the filed return unless a permissible method change is made. An internal Zoho setup does not elect or change a federal accounting method.
- Ordinary fourplex rent with normal landlord services is generally Schedule E and excluded from self-employment income. Maid/linen/regular in-unit service or a separate management business can change the return and payroll analysis.

4. Core transaction rules

Issue	Federal operating rule	Primary IDs
Rent and fees	Include current rent, advance rent, late/returned-payment/cancellation fees, tenant-paid owner expenses, and property/services received as rent under the applicable timing method	FED-010, FED-020
Refundable deposits	Liability while returnable; income when GH's legal right to retain becomes fixed. Last-month rent is advance rent, not a deposit	FED-010, FED-020
Gross processor settlement	Record gross tenant consideration and a separate processing fee; reconcile Forms 1099-K but do not use them as the taxability test	FED-020, FED-052
Schedule	Ordinary long-term rental with normal services is generally Schedule E; substantial tenant-convenience services can point to Schedule C and self-employment tax	FED-021, FED-034
Vacancy	Deductions and depreciation generally begin when ready and available for rent and can continue during temporary vacancy if still held out for rent	FED-020, FED-022
Mortgage	Interest may be deductible to rental use; principal is not; escrow deposits are not expenses; cash-out interest follows use-of-proceeds tracing	FED-012, FED-020
Repair vs improvement	Deduct repairs; capitalize betterments, restorations, adaptations, acquisitions, and production. Analyze building and each building system	FED-013 to FED-018
De minimis safe harbor	Without an AFS, up to \$2,500 per invoice/item if a beginning-of-year procedure exists, books follow it, and annual election is attached to a timely original return	FED-015, FED-018
Small-taxpayer building safe harbor	Average gross receipts <= \$10 million; building unadjusted basis <= \$1 million; annual total <= lesser of \$10,000 or 2%; annual building-by-building election	FED-017
Routine maintenance	Recurring building work reasonably expected more than once during the 10-year period may qualify; preserve the expectation and scope evidence	FED-017
Depreciation	Land excluded; residential rental building generally 27.5-year GDS, straight-line, mid-month; separate shorter-life assets only with support	FED-022 to FED-026
Conversion	For personal-to-rental conversion, depreciation basis is generally lower of adjusted basis or fair market value at conversion; allocate land and personal periods	FED-020, FED-023
Allowed or allowable	Basis is reduced by depreciation allowed or allowable; a missed-depreciation correction may require an accounting-method change	FED-022 to FED-025
Loss limits	Apply basis/at-risk, passive activity, and excess-business-loss rules in the proper order; suspended losses need year-by-year rollforward	FED-030, FED-031, FED-033
QBI	Rental qualifies only if it is a Section 162 trade/business or meets Rev. Proc. 2019-38; safe harbor requires separate books, service records, exclusions, and statement	FED-032, FED-033
Vendor reporting	Collect W-9; for 2026 payments, general threshold \$2,000 subject to exceptions; payment cards/qualifying networks are reported by settlement entity	FED-042, FED-050 to FED-052
Cash > \$10,000	File Form 8300 generally within 15 days for one or related transactions; specialized cash definition excludes ordinary checks/cards/ACH/wires	FED-053
Records	Retain source documents, ledgers, elections, audit trail, basis/depreciation, and electronic retrievability sufficient to substantiate every return amount	FED-045 to FED-047

5. Repairs, improvements, and 2026 renovations

A single invoice amount does not decide classification. Analyze the unit of property and the entire plan of work. For a building, the regulations separately test the building structure and systems such as HVAC, plumbing, electrical, elevators, fire protection, security, gas distribution, and other listed systems. A replacement that materially improves, restores, or adapts the unit of property is capital even when the contractor calls it a repair.

2026 control

Do not post the entire renovation program to a 'Renovations' expense account. Build an invoice-level schedule showing scope, related project, building/system, unit, placed-in-service date, book treatment, federal tax treatment, Kansas treatment, and supporting source.

Rule / election	Core conditions	Documentation
De minimis safe harbor	No AFS; generally <= \$2,500 per invoice or separately stated item; beginning-of-year expensing procedure; consistent books; timely original-return election	Written prospective policy, invoices/itemization, book treatment, annual election statement
Small-taxpayer building safe harbor	Average gross receipts <= \$10M; eligible building unadjusted basis <= \$1M; annual total <= lesser of \$10,000 or 2%	Building basis, gross-receipts test, annual project total, building-specific election
Routine maintenance	Recurring work reasonably expected more than once in the building/system's first 10 years; not every replacement qualifies	Maintenance plan, age, history, manufacturer recommendations, scope

Rule / election	Core conditions	Documentation
Materials and supplies	Special rules for components, consumables, and property with economic life $\leq$ 12 months or qualifying low cost	Receipt, first-use date, item classification, no duplicate capitalization
Betterment/restoration/adaptation	Capitalize material additions/capacity/productivity/quality gains, restorations, and new/different uses	Before/after facts, plan of rehabilitation, system analysis, placed-in-service date

6. Depreciation and basis control

Asset / event	Default federal control	Do not assume
Land	Allocate and exclude from depreciation	County allocation automatically equals federal fair-value allocation
Residential rental building	27.5-year GDS, straight-line, mid-month after ready and available for rent	Purchase date or first-rent receipt is always placed-in-service date
Appliances, carpet, furniture	Often 5-year property if separately supportable	Every invoice called 'appliance' qualifies or Section 179 applies
Land improvements	Often 15-year property if separately supportable	Building structural components can be moved to land improvements without analysis
2025-2026 qualified property	100% bonus may apply to eligible property acquired after Jan. 19, 2025 and placed in service, subject to exclusions	27.5-year building or land qualifies; passive limits disappear
Personal-to-rental conversion	Depreciation basis generally lower of adjusted basis or FMV at conversion, land excluded	Original purchase basis always controls
Missed depreciation	Allowed-or-allowable rule reduces basis; correction may require Form 3115	Begin claiming late without method analysis
Disposition	Track asset-level proceeds, adjusted basis, depreciation, recapture, and gain character	Net sale proceeds against one building balance

7. Loss limitations and QBI

- Apply limitations in order: basis and at-risk rules; passive-activity rules; then excess-business-loss rules. Carry each limitation separately.
- Normal rental real estate remains passive even with active management unless a statutory/regulatory exception applies. The active-participation allowance can be up to \$25,000 and generally phases out between \$100,000 and \$150,000 of modified adjusted gross income, with special filing-status rules.
- Real-estate-professional status requires more than 750 hours and more than half of the taxpayer's personal-service time in real-property trades/businesses, plus material participation in the rental(s). Do not infer it from job title or ownership.
- Rental income is QBI only when the activity is a Section 162 trade/business or meets Revenue Procedure 2019-38. The safe harbor needs separate books, qualifying rental-service hours, contemporaneous records, exclusions, and an attached annual statement.
- Passive-loss and QBI conclusions should be made on the individual return facts, not inside Zoho alone.

8. Vendor, payment, and cash reporting

Question	2026 control
Threshold	General Sections 6041/6041A threshold is \$2,000 for payments after Dec. 31, 2025; royalties, attorney gross proceeds, backup withholding, and other exceptions use different rules
Payment rail	Check, ACH, cash, and direct bank payments enter GH's payer analysis; payment-card and qualifying third-party-network payments generally are reported by the settlement entity on Form 1099-K
W-9	Collect before payment; validate legal name/TIN/entity type; maintain backup-withholding workflow for missing/incorrect TINs
1099-K	Reconcile gross amount to Zoho and processor fees/refunds/chargebacks; never use form threshold to decide whether rent is income
Cash over \$10,000	Form 8300 may be due within 15 days for one or related transactions. 'Cash' has a specialized definition; ACH/wires/cards/ordinary checks are generally excluded
E-filing	The federal 10-return aggregate e-file threshold generally counts covered information returns across types; use current instructions and FIRE/IRIS requirements

9. 2025-2026 changes and stale-source traps

1. Permanent 100% bonus depreciation now applies to qualifying property acquired after January 19, 2025. The residential building and land do not qualify; shorter-life assets still require correct classification and passive-loss analysis.
2. For payments made in 2026, the general information-return threshold is \$2,000, not the \$600 shown in 2025 Schedule E instructions. Form-specific exceptions remain.
3. The third-party settlement organization Form 1099-K threshold is again more than \$20,000 and more than 200 transactions. Payment-card reporting is separate, and processors may issue a form below a threshold.
4. The QBI deduction is permanent, but rental real estate is not automatically QBI. Do not rely on an outdated IRS web page that says Section 199A ended after 2025.
5. The 2026 business mileage rate changed midyear: 72.5 cents through June 30 and 76 cents beginning July 1 under Announcement 2026-11.
6. Domestic US-created LLCs are currently exempt from CTA BOI reporting. Older broad domestic-entity filing guides are obsolete.
7. FinCEN's Residential Real Estate Rule was vacated March 19, 2026 and is under appeal. Recheck the live FAQ before any covered transfer.
8. Publication 535 was discontinued after tax year 2022. Use the current IRS business-expense resource map and topic-specific publications.
9. Never use a document marked DRAFT - NOT FOR FILING as current authority.

10. US GAAP applicability and topic map

No general federal rule identified requires this private, non-SEC, single-member fourplex landlord to issue GAAP financial statements. GAAP can become mandatory through a lender covenant, investor agreement, court order, grant, insurance contract, or other specific requirement. If GH chooses GAAP, it must apply the relevant Codification consistently and prepare the required statements/disclosures for the stated reporting framework.

ASC topic	Why it can matter to GH	Project instruction
ASC 105	GAAP hierarchy	Use the Codification as authoritative; ASUs explain amendments but are not the final authoritative text
ASC 210	Balance-sheet presentation	Separate current assets/liabilities where a complete GAAP statement is prepared
ASC 230	Statement of cash flows	Classify operating, investing, and financing cash flows if a complete GAAP statement is required
ASC 250	Accounting changes and error corrections	Distinguish policy changes, estimates, and prior-period errors; document corrections
ASC 305	Cash and restricted cash	Assess whether deposit/escrow cash is restricted based on legal or contractual terms
ASC 326	Receivables and credit losses	Accrual GAAP receivables need expected-credit-loss analysis; tax cash-basis uncollected rent is different
ASC 360	Property, plant, equipment; depreciation; impairment	Capitalize assets, assign useful lives, record book depreciation, and review impairment; tax lives may differ
ASC 405	Liabilities	Refundable tenant deposits are obligations until released/applied under enforceable terms
ASC 450	Contingencies	Assess probable and estimable losses; disclose material contingencies as required
ASC 470 / 835	Debt and interest	Separate principal, interest, debt issuance costs, maturities, and imputation matters
ASC 505	Equity	Member contributions and distributions are equity, not income or expense
ASC 606	Revenue from nonlease contracts	Lease consideration is generally outside ASC 606; distinct nonlease services may require analysis
ASC 740	Income taxes	Usually not an entity-level provision for a disregarded LLC, but relevant if tax status or reporting entity changes
ASC 842	Lessor lease accounting	Core GAAP topic for rent, lease classification, collectibility, variable payments, and nonlease components
ASC 970	Real estate - general	May provide specialized real-estate guidance for certain transactions; use only when the subtopic applies
